## PERSONAL SUMMARY

Full-Stack Software Engineer with ~1 year of experience, transitioning into the Data Analytics world after discovering my passion for working with Data and AI. In the next month, I am taking an exam to gain a PCAD (Certified Associate Data Analyst with Python) qualification. With ~7 years of professional experience across a range of roles such as Front-End Web Development, Sales & Marketing, and Customer Service, in both remote and on-site environments, I bring a collection of highly valuable and transferrable skills to any professional setting.

## SKILLS

**Technical Skills:** Data Science & Analysis, Python, SQL, HTML, CSS, BootStrap, JavaScript, UI & UX Skills, Django, Git.  
**Software Skills:** DBeaver, Excel, Tableau, GitHub, Heroku, CRM Systems, Canva, DaVinci Resolve.

## EDUCATION

### Code Institute

Full-Stack Software Development Bootcamp

Bristol, United Kingdom (Full Time, Remote)

March 2024 – July 2024

- **Concentration:** Front-End Website Development and Back-End Database Management.
- **Related Coursework:** Coding in HTML, CSS, JavaScript and Python. Utilising API's and frameworks such as BootStrap and Django. Managing Databases with SQL and PostgreSQL. Learning how to work in Agile and Scrum methodologies.

### St Brendan's Sixth Form College

A-Level Studies

Bristol, United Kingdom (Full Time, On-Site)

September 2018 – March 2020

- **Concentration:** Three A-Level qualifications in Business, Sociology and Geography.
- **Related Coursework:** Mathematics, Statistics, Data Analysis & Interpretation, Project Management, GIS Systems, Research Methods, Human-Computer Interaction.

## PROFESSIONAL EXPERIENCE

### Digital Futures

Data Analyst Trainee

Bristol, United Kingdom (Full-Time, Hybrid)

March 2025 - Ongoing

- I attended a twelve-week programme, studying towards becoming a certified Data Analyst. I have gained skills, experience & comprehensive knowledge in complex Data Science concepts. In the next month, I am taking an exam to gain a PCAD (Certified Associate Data Analyst with Python) qualification.

### Marks & Spencer

Customer & Operations Assistant

Bristol, United Kingdom (Part-Time, On-Site)

August 2024 – Present

- I provide excellent customer service by assisting our shoppers and answering any questions all whilst ensuring a positive shopping experience. I also assist in the operations department, where I manage the incoming deliveries, segregate products to their dedicated location on shop floor, to ensure smooth colleague experience. To add to this, I have taken safety courses, as I manage the backstage of the store when on operations duty. I was a full-time employee before my new role with Digital Futures, since then, I have become a part-time employee.

### Wholesome Hub

Front-End Website Developer

Bristol, United Kingdom (Freelance, Remote)

July 2024 – August 2024

- I developed a Front-End Website for a local coffee business that I have previously worked for. I wrote clean and readable HTML & CSS code, to create a visually appealing and responsive design. I worked with the BootStrap framework, to ensure cross-browser compatibility. I used Canva to create and edit images, to increase UX. I also utilised semantic HTML to boost SEO. In 2025, they are rebranding, thus, their website has been taken down. I am planning on redesigning the website, with the date to be confirmed.

### Wholesome Hub

Barista & Supervisor

Bristol, United Kingdom (Full-Time, On-Site)

November 2023 – March 2024

- I prepared and served coffee and other drinks in the café, operated espresso machines, and improved my latte art skills. I delivered excellent customer service, processed payments through the point-of-sale system, and collaborated with my team to ensure smooth operations while creating a friendly and inviting atmosphere. I was offered a promotion as a supervisor, which boosted my leadership skills.

**Springfield Supplies & Projects**  
*Sales & Digital Marketing Assistant*

**Thornbury, United Kingdom (Full-Time, On-Site)**  
*August 2023 – November 2023*

- I supported the sales and marketing team by handling administrative tasks, updated our CRM systems, regularly contacting customers via phone call and email, created digital marketing content and assisted with multiple marketing campaigns. I helped generate leads & tracked our sales and marketing performances. Overall, I ensured smooth operations and contributed to business growth, all while collaborating with my colleagues.

**SOHO Coffee**  
*Barista*

**Bristol, United Kingdom (Full-Time, On-Site)**  
*August 2022 – August 2023*

- I made and served coffee as well as other drinks in the café, worked with espresso machines, and further developed my latte art. I provided great customer service, handled payments using the point-of-sale system, and worked closely in a tight-knit team to keep things running smoothly while maintaining a welcoming atmosphere.

**Striders Network**  
*Brand Ambassador*

**Bristol, United Kingdom (Full-Time, On-Site)**  
*May 2022 – July 2022*

- I sold products door-to-door, engaging with customers face to face. I presented sales pitches and demonstrated product knowledge. To add to this, I held a presentation to the other brand ambassadors regarding self-development and my journey, as I really wanted to improve my public speaking abilities as it was certainly a weak point throughout the early stages of my working life.

**Café Du Jour**  
*Barista*

**Bristol, United Kingdom (Full-Time, On-Site)**  
*November 2021 – May 2022*

- I made and served coffee as well as other drinks in the café, worked with espresso machines, and further developed my latte art. I provided great customer service, handled payments using the point-of-sale system, and worked closely in a tight-knit team to keep things running smoothly while maintaining a welcoming atmosphere.

**Midas Construction**  
*Procurement Administrator*

**Bristol, United Kingdom (Full-Time, Hybrid)**  
*September 2020 – November 2021*

- I supported purchasing processes by handling administrative tasks, sourcing suppliers, obtaining quotes, processing purchase orders using procurement software and maintained records. I ensured that goods and services are procured efficiently and increased supplier relationships by attending multiple face-to-face meetings to discuss the ever-changing budgets due to the COVID-19 pandemic.

**Boots**  
*Retail & Photography Assistant*

**Bristol, United Kingdom (Full-Time, On-Site)**  
*November 2018 – September 2020*

- I provided excellent customer service during photo sessions and assisted with our self-serving printing systems, managed complex machinery to develop film cameras and image printing, and learnt the in-house software for image editing. I moved store halfway through my tenure with Boots, which boosted my adaptability skills.

## PERSONAL PROJECTS

---

**Song Recommendation Generator**  
*Data Science – Machine Learning Algorithm*

*May 2025*

- I utilised a cosine similarity algorithm which matches an inputted song to twenty other tracks, with relation to similarity based off of the Spotify API's inbuilt musical parameters. I developed a command line input interface for the user to enter a song title and artist, and is returned the top twenty most similar tracks in the dataset. I performed in depth EDA to uncover trends and patterns in the dataset and cleaned & pre-processed 100,000+ rows of data. Upon completion, I created a presentation on Canva to convey complex concepts tailored for both technical and non-technical audiences, which is attached to this post.
- GitHub Repository: <https://github.com/JamieBennett-Dev/Song-Recommendation-Generator>

**Calorie Tracker**  
*Full-Stack Website Development – Django Framework*

*June 2024 – July 2024*

- A full-stack web application to assist users in daily calorie intake and weight management. I created an intuitive and easy-to-navigate interface, making it effortless for users to log their meals and track their calorie intake without any hassle. The app automatically calculates the total calories consumed based on the foods logged, saving the user time and effort in manual calculations. Developed charts and graphs for the user to visualise their daily, weekly, and monthly calorie consumption trends, providing insights into eating habits and progress over time. Ensured mobile responsiveness, allowing the user to log meals and monitor progress on the move. All data and sensitive information is stored in a secure and private database, ensuring user confidentiality.
